

Press release of 1st March 2016

Integration of FORTUNA into FISCHER

Dear Sir or Madam

FISCHER FORTUNA GmbH has been designing, manufacturing and distributing spindles for machine tools with a variety of applications for decades. Additionally, the company repairs its own products as well as third-party spindles. For 13 years, FISCHER FORTUNA GmbH has been part of the FISCHER Spindle Group, located in Switzerland.

For the purpose of concentrating the business, the board of directors of the holding company decided to centralize the manufacturing and assembly capacity of the entire spindle range at our parent plant in Switzerland. Field Sales and Development/Construction will remain in Leinfelden-Echterdingen, Germany.

With effect from 1st March 2016, the administration and organization of business will be conducted by FISCHER AG in Switzerland and orders for new spindles will be delivered from there. All repairs will be processed in Switzerland reliably and will meet the highest quality requirements. You may let us assume all administration, freight and custom clearances. Simply order the SPINDLE-TAXI, our free pick-up service for all spindles within the EU. Please [click here](#) for more information.

Our team will be happy to answer any questions you might have or provide you with additional information:
