

Official release

Le Landeron / Herzogenbuchsee, June 25, 2026

## **ROLLOMATIC GROUP and FISCHER have entered into a strategic partnership in the field of spindle manufacturing. FISCHER has acquired Robert Renaud SA.**

FISCHER and ROLLOMATIC GROUP have entered into a strategic partnership: FISCHER will become ROLLOMATIC GROUP's partner for spindles and will take charge of the development and production of high-precision spindles for tool grinding. In addition, the global after-sales service dedicated to spindles will be strengthened and expanded at the local level through FISCHER's international service centers.

As part of this partnership, FISCHER is acquiring the spindle manufacturer Robert Renaud SA. The Boudry, Switzerland, facility will become part of the FISCHER Group and will be expanded as a European service center. The proven Renaud spindle product line will be maintained, with a focus on customer needs.

Through its partnership with spindle specialist FISCHER, ROLLOMATIC GROUP is thereby sustainably consolidating its position as a technology leader and strengthening its presence in the global market as a supplier of high-precision solutions.

With the acquisition of Robert Renaud SA, FISCHER further strengthens its market presence and expertise in the field of high-precision spindles. Customers thus benefit from innovative solutions and a robust service offering.

### **ABOUT THE ROLLOMATIC GROUP**

*Road To Automation*

The ROLLOMATIC GROUP industrial group has nearly 600 employees and is headquartered in Le Landeron, Switzerland. With an international presence across eight locations, the group combines the expertise of ROLLOMATIC GROUP and ERT Solutions to offer comprehensive solutions in high-precision CNC machines. The company is specialized in the design and manufacturing of high precision CNC machines for production grinding of cutting tools, cylindrical grinding, and laser machining of ultra-hard materials. ROLLOMATIC GROUP stands out for its unique industrial expertise, long-term strategic vision, and a strong focus on providing personalized support to its customers.

### **ABOUT THE FISCHER GROUP**

*Perfect rotation. Precise. Fast. Powerful.*

The family-owned FISCHER Spindle Group AG, headquartered in Herzogenbuchsee, Switzerland, is one of the world's leading manufacturers of precision spindles, milling heads, air compressors for fuel cells, and refrigerant compressors for heat pumps. Innovation is an integral part of FISCHER's DNA, driven both by in-house developments and through collaboration with startups within the group. The customer is at the heart of FISCHER's strategy: with six locations worldwide, more than 450 employees, and more than 85 years of experience, FISCHER provides customized solutions that stand out for their quality, innovation, and service excellence.
