Assembly Repair Technician

At FISCHER USA, we are committed to delivering an extraordinary customer service experience. Our Assembly Technicians contribute to this goal by providing their expertise in the build, repair, and testing processes.

We are expanding our operations and looking to add technicians with an aptitude for mechanical assembly and who enjoy troubleshooting in a collaborative team environment. Read on to learn more about what Assembly Repair Technicians do at FISCHER USA.

- ◆ Use work instructions, prints, routings, and established techniques to assemble precision parts and subassemblies to complete product specifications.
- ◆ Inspect or test products throughout the assembly process. Record test results and required data.
- ◆ Identify non-conforming work and initiate corrective action when needed.
- ◆ Utilize manual machine shop equipment to finish or bring assemblies, parts, or spindles within tolerance.
- ◆ Dismantle and analyze repair products for non-conforming parts and quoting of service orders.

What qualifications make an Assembly Repair Technician successful?

- ◆ Experience or training on building or repairing electro-mechanical devices (auto, motorcycle, etc.)
- ◆ Excellent mechanical aptitude and ability to read and understand complex blueprints & schematics.
- ◆ Ability to comprehend complex mechanics and analyze technical problems.
- ◆ Good written and oral communications ability and proficient in use of basic MS Office software.

FISCHER USA offers an outstanding benefits package including *Medical, Dental, Vision, Health Savings Employer Contributions, 401K, Vacation, Holidays, Profit Sharing, Tuition and Fitness Club Reimbursement Programs, and a 100% climate controlled facility.*
